

Assignment 3: “SMS generator”

A lecturer would like an application that enable him to send sms(plural) to a whole class in case the lecturer reports sick – for instance.

Requirements:

- Lecturer should be able to add a class and add the relevant students + student info.
- Lecturer should be able to add a sms message to the class
- Lecturer should be able to add a sms message to all students.
- A sms could either be sent per direct or based on pre-determined time
